

SPAIN MISSION 22nd – 23rd SEPTEMBER 2022

Organized by the Foundation for the Development of New Hydrogen Technologies the 3rd networking workshop being part of the H2GLOBAL Alliance for Internationalisation business mission, held in Zaragoza on 22nd - 23rd September 2022 will aim to showcase successful green hydrogen projects and development of hydrogen economy in Spain, share experiences, establish cross-sector cooperation and sustainable business partnerships for the development of green hydrogen technologies.

The event will be composed of two-day workshop with B2B networking sessions held both days, gathering H2GLOBAL Partner Clusters and Cluster members from Spain, Portugal, Poland, Italy and France being experts in broadly understood green hydrogen technologies.

- On **22nd September** a session of presentations of participating companies and field trip for the demonstration of green hydrogen projects in Spain will take place in order to explore potential opportunities for collaboration.
- On **23rd September** a workshop conference hosting experts in hydrogen field will be held focusing on green hydrogen economy in Spain addressing H2GLOBAL project objectives.
